

William Wun

Software Engineer — Java, Microservices & Cloud-Oriented Architecture | MBA

(+1) 778-858-3949 | williamwun@gmail.com | Vancouver, BC | linkedin.com/in/williamwunrafael

PROFESSIONAL SUMMARY

Software Engineer with **7+ years** of experience developing RESTful APIs and backend services in mission-critical, regulated banking environments (Scotiabank LATAM). Strong expertise in Java and Spring Boot, secure system integrations, SQL-based transactional logic, and production support. Recently designed and implemented a production-style microservices architecture using Java 17 and Spring Boot, applying resilience patterns (Circuit Breaker, Retry, Idempotency) and containerized, cloud-ready design principles aligned with AWS architecture fundamentals.

HIGHLIGHTS

- 7 years engineering secure financial backend systems in regulated banking (Scotiabank LATAM).
- Owned 25+ critical ETL pipelines across 7 LATAM markets supporting 1000+ agents.
- Designed RESTFUL microservices architecture (Java 17, Spring Boot, Docker).
- Applied resilience patterns (Circuit Breaker, Retry with Backoff, Idempotency).
- Implemented JWT & OAuth2 authentication with defense-in-depth validation.
- Cloud-oriented backend design aligned with AWS architectural principles.

SELECTED ARCHITECTURE PROJECT

Acme Shop — Production-Style Microservices Backend (Java 17 | Spring Boot | Docker | AWS-ready)

Designed and implemented a distributed microservices architecture simulating real-world e-commerce systems:

- API Gateway (Spring Cloud Gateway) with centralized routing, Restful request & JWT validation.
- Authentication Service (JWT + Openid Connect / OAuth2 Google integration).
- Service-to-service security (Feign + token propagation).
- Resilience patterns (Resilience4J: Circuit Breaker, Retry with backoff).
- Idempotency strategy with request hashing & DB unique constraints.
- Database-per-service pattern (PostgreSQL).
- Redis caching strategy for read optimization.
- Docker Compose orchestration.
- Observability & metrics exposure (Actuator & Micrometer).
- CI/CD pipeline using GitHub Actions for automated build and deployment validation.

WORK EXPERIENCE

Regional IT Analyst - Banking Systems Engineering (Java, ETL & Integrations)

Scotiabank - LATAM • Lima, Peru | 2017 – 2023

CAT - Campaigns & BI (2017–2020)

- Owned and improved **25+ mission-critical ETL** and SQL-based data processing pipelines (SQL Server, SSIS) powering executive KPI dashboards across 7 LATAM markets.
- Increased operational continuity by reducing ETL failure rate via schema-drift detection and data-quality validation.
- Managed **secure production deployments** and post-release validation cycles in enterprise environments involving 100+ international stakeholders.
- Enforced secure execution workflows and governance controls across ETL processing environments using IBM WebSphere and WinSCP.
- Delivered Java/Thymeleaf enhancements boosting campaign performance visibility.
- Designed and implemented a Java Spring Boot + Bootstrap module for campaign management enhancements (6-month project).

IAP - Lending Core & Digital Onboarding (Java & Spring Boot Backend) (2020–2023)

- Developed and enhanced Spring Boot Restful backend services supporting **loan & leasing approval flows** improving accuracy of credit decisions for Costa Rica and Panama.
- Investigated and restored integration workflows between IAP and external credit-risk engines, providing production support and preventing customer impact.
- Improved DB2 transaction logic and SQL data rules to ensure consistency and approval readiness.
- Built and integrated Spring Boot Rest and SOAP based services with **AS400 & IBM DataPower**, strengthening multi-system orchestration.
- Collaborated with Business Analysts and Infra teams ensuring SLA-driven production recovery.

TECH SKILLS

- **Backend** | Java 11/17 · Spring Boot · Restful APIs · SOAP Web Service · SQL · Data Validation
- **Security:** JWT · OAuth2 · Role-based access · Defense-in-depth
- **Resilience:** Circuit Breaker · Retry · Idempotency · Backoff strategies
- **Cloud & DevOps:** AWS (EC2, IAM, S3) · Docker · GitHub Actions · Terraform (basic)
- **Data:** PostgreSQL · SQL Server · IBM DB2 · SSIS
- **Observability:** Spring Actuator · Micrometer
- **Tools:** Jira · Bitbucket · ServiceNow · WebSphere

EDUCATION

Master in business administration (MBA)

UCW · Vancouver, Canada

Bachelor of Software Engineering

UPC · Lima, Peru
